

<i>Please ensure this tracking sheet is completed as a group, as it will be used to monitor your individual participation within the team.</i>						
Team Members	Role/ Responsibility	Email				
Habibllah Ayodele	Data inspection. Preprocessing code	h.ayodele@alustudent.com				
Dedine Mukabucyana	Dataset description and use case. PCA functions	d.mukabucya@alustudent.com				
Task Allocation and Tracker						
	Task Allocated	Assigned Member	Deadline	Completion Status (Not Started/In Progress/Completed/Did not participate)	Reviewed by Team? (Yes/No)	Comments
	Review the dataset documentation. Write a short dataset description, the use case, and why it fits PCA. Prepare the PCA functions: covariance, eigenvalues and eigenvectors, sorting, explained variance, and projection.	Dedine Mukabucyana	29th September 2026	Completed	Yes	Wrote a short description of the dataset, how it can be used, and why PCA fits it. I also wrote and tested the PCA code: covariance matrix, eigenvalues and eigenvectors, sorting, explained variance, and projection.
	Inspect the dataset: find number and text columns, missing values, duplicates, IDs, and dates. Choose the columns to leave out of PCA. Prepare the preprocessing code for missing values, encoding, centering, and standardization.	Habibllah Ayodele	29th september 2926	Completed	Yes	Checked the data for number columns, text columns, missing values, IDs, and dates. I wrote code to fill in missing values, turn the region text column into numbers, and put all columns on the same scale.

	Decide the final columns for PCA. Agree how to handle missing values and text columns. Combine the preprocessing and PCA code, run Task 1, and check the results. Complete Task 2 (choose the number of components from explained variance and explain the trade-off). Make the before and after PCA plots. Complete Task 3 (speed test on different dataset sizes). Do the final polishing: one person does the interpretation, GitHub, and submission checks; the other does the plots, comments, formatting, and benchmark presentation.	Habibllah Ayodele, Dedine Mukabucyana	30th September 2026	Completed	Yes	Chose the final columns and join our two parts of the code. Still to do: finish the plots, the speed test, and the GitHub upload, then submit.

Meeting Attendance Log

Meeting Date	Agenda	Facilitator	Attendees	Key Discussion Points	Next Steps	
25th september 2026	Understanding the assignment	Dedine Mukabucyana	Habibllah Ayodele, Dedine Mukabucyana	We read through the assignment together and thought about which datasets we could use.	Coming up with datasets to use	
26th September 2026	Dividing tasks	Ayodele Habibllah	Habibllah Ayodele, Dedine Mukabucyana	Ayodele came up with datasets and we chose the Madagascar food prices data. Ayodele started the assignment. We divided the tasks: Ayodele inspects the data and prepares the preprocessing code, and Dedie writes the dataset description and the PCA functions.	Finish our own parts, then meet to join them, create the GitHub repository, upload our files, and submit.
